WELCOME RAY WARREN

Grassland Equipment & Irrigation would like to welcome Ray Warren to the commercial sales team! Ray will be taking over for Chris Pogge as the Commercial Sales Territory Manager in the Hudson Valley region.

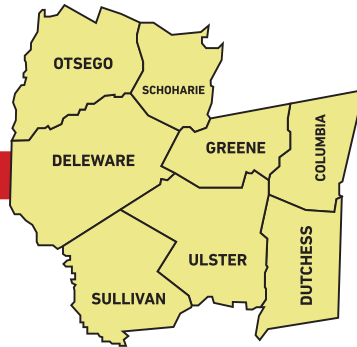

Ray comes to Grassland with 14 years of experience previously working at turf solution companies.

Ray grew up in the Hudson Valley region and has worked at a few local golf courses in that time.

He is excited to bring his love of golf, turf knowledge and industry experience to his customers.

Ray's contact is **845-260-0518** or
rwarren@grasslandcorp.com.

Ray Warren's Territory

LATHAM SHOWROOM REFRESH

With the completion of the Toro 60V Flex Force wall display, the rest of our Latham store showroom was feeling a little lackluster. So we decided to spruce up the rest of the space with new slatwall covers, signage, fresh paint, TVs, literature racks and more. From the parts counter, to our expansive Echo outdoor power tool wall, to the custom Ventrac barn board wall; the showroom features a much more cohesive and modern feel.

Stop in and take a look for yourself. Grassland is committed to making your visit to our store as enjoyable as possible. That begins with a clean showroom and making it simple to find what you are looking for!

ECHO ROBOTICS TM-2050 W/ RTK GPS

THE FUTURE OF TURF MANAGEMENT - ECHO ROBOTICS

As golf club superintendent or a grounds supervisor responsible for keeping sports fields in perfect condition, you are aware of how much time it takes to look after these grounds. Perhaps you are looking for solutions to help you or your staff by taking over some time-consuming and unprofitable tasks. Say goodbye to your old habits and step up with the robot lawn mowers and gold ball pickers from Echo Robotics, now distributed through Grassland Equipment.

THE CUTTING EDGE OF TECHNOLOGY

Echo Robotics turf mowers, allow you to mow your grounds with ease to particularly extended schedules. No need to be constantly hovering over your robots. Just program them and they do the rest. You can even give them remote commands with the smart phone app. And with the all-new GPS RTK technology you'll get increased precision and accuracy.

TM-1000 & TM-2000 (Random)

The TurfMower series' mowers are not only autonomous and emissions-free, they also promote healthier, better looking turf. With 24/7 operation, advanced safety features, remote command and monitoring, reduced environmental impact, quiet operation, 8x lower energy costs, and that fresh mowed look all day, every day ...are you ready?

TM-1050 & TM-2050 (RTK GPS)

Go even further with the TM-1050 & TM-2050, equipped with RTK GPS technology. Say good-bye to random lines with systematic strip mowing. With an accuracy of around 2-3 cm, there is minimal overlap. And tripling the robot's performance and improving the mowing capacity makes it possible to mow even faster!

RP-1200 (Random) & RP-1250 (RTK-GPS)

In addition to maintaining your turf, the collection of balls can be done autonomously as well. Designed to work in perfect tandem with the TM-2000, your driving range can be 100% self-sufficient. The Range Picker reduces ground compaction and can pick up as many as 350 balls. You can even program the picker to focus on high density areas for greater efficiency. Never shut down for ball picking again!

ECHO ROBOTICS TM-2000 TURFMOWER

ECHO ROBOTICS RP-1250 RANGE PICKER

Contact Cody Schuster, cschuster@grasslandcorp.com for more information or to schedule a demo.

THANK YOU CUSTOMERS!

AVERILL PARK CSD

Averill Park Central School got their new Toro SandPro 5040. Your fields will look better than ever this season!

SCHUYLER MEADOWS

Schuyler Meadows got their new Toro MultiPro 1750 Geolink Sprayer! Thank you!

STRATTON ANG BASE

Stratton ANG Base took delivery of a shiny new Toro Groundsmaster 3200. Thank you for your patience Anton!

GREEN LAKES STATE PARK GOLF

Green Lakes SP Golf's Kevin (Super) and Sean (Head mechanic) with their new Workman HDX w/ Multi Pro Sprayer.

WEST GENESEE SCHOOL

West Genesee School taking delivery of their new Groundsmaster 5900.

KENDAL AT ITHACA

Josh from Kendal at Ithaca adds to their growing fleet of Toro vehicles with 2 Workman GTX Lithiums.

WATERTOWN PARKS & REC

Watertown Parks and Rec take delivery of their new Groundsmaster 5900.

ONONDAGA COUNTRY CLUB

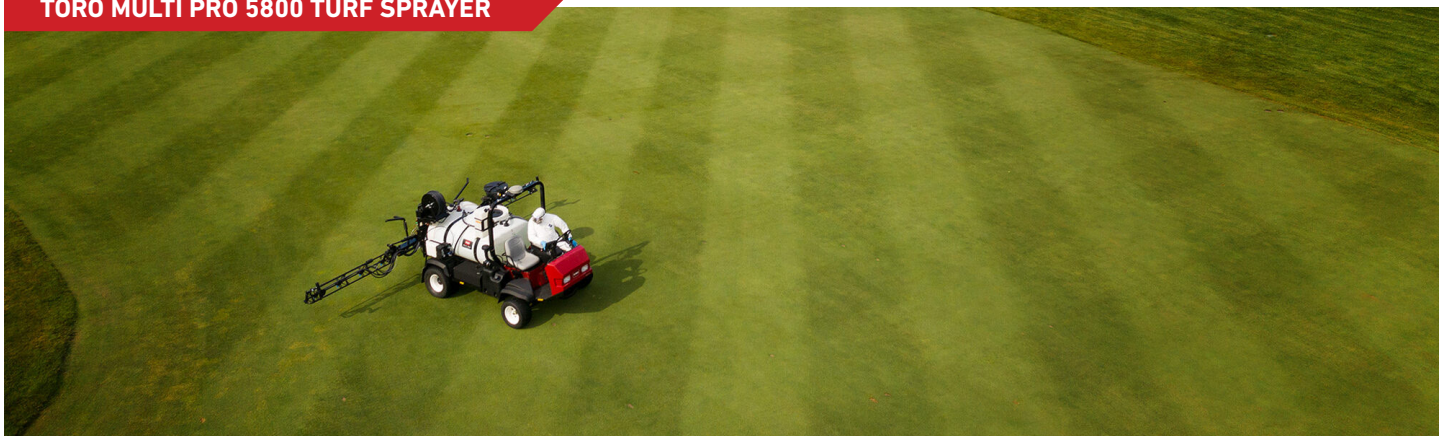

Superintendent, Chris taking delivery of his preowned Reelmaster 3555s.

GERALD B.H. SOLOMON NATIONAL CEMETERY

...took delivery of a whopping 144" Toro Z Master 7500 series zero turn. Thanks Bill!

TORO MULTI PRO 5800 TURF SPRAYER

TORO ENHANCES MULTI PRO® SPRAYERS w/ GEOLINK® PRECISION SPRAY SYSTEM

Since its introduction to the Multi Pro® line in 2015, GeoLink® Precision Spray has helped maximize efficiency and deliver exceptional coverage by utilizing GPS technology to map out precise spraying locations. New in 2024, Toro is excited to announce necessary advancements in GeoLink Precision Spray to improve accuracy and make the Multi Pro Sprayers easier for crews to use.

GeoLink Precision Spray is Toro's exclusive turf-based GPS spray system that tracks the sprayer's precise location for repeatable mapping. If an operator covers previously sprayed ground, GeoLink Precision Spray automatically turns individual nozzles on and off to avoid the risk of over applying. With the single-nozzle level of control, superintendents can minimize over spray, which contributes to significant reductions in overall application costs.

New global modern technology automatically connects to the best cell signal on the property, regardless of the carrier. The brand-new display is 40% larger than the previous model and includes day and night models for increased visibility in sun-light. The productivity enhancing GeoLink Autosteer feature ensures the optimal next pass is followed, making the most efficient use of your sprayer. Standard on Multi Pro 5800 models, the ExcelaRate® control system lets crews calibrate and save their two most used flow rates for simple, repeatable accuracy.

The GeoLink Precision Spray System truly puts precision at the top of the priority list. With the improved system, controller and section valves accurately turn individual nozzle sections on and off based on the location of the machine for precise application. This technology is now capable of tracking twice as many satellite constellations for highly accurate real-time kinematic (RTK) positioning. It also has a fallback feature that maintains accuracy if RTK is lost temporarily.

To learn more about the Multi Pro Sprayer w/ GeoLink Precision Spray System, **contact your Grassland commercial salesman.**

THANK YOU CUSTOMERS!

JOE BISCOSSI (HOMEOWNER)

A new Ventrac 4520P with Wide Area Mower and Snowblower for Joe today. Thank you!

ALBANY COUNTY WATER PURIFICATION

Albany County Water Purification took delivery of an all new Toro Grandstand HDX! Thanks David.

SECRET GARDENER

Hot off the production line, our first Toro Dingo TX1000 TURBO hits the workforce. Thanks Ben!

GLENS FALLS CC

A new Foley Company 672 Bedknife Grinder found its home with Noah Tubbs and Brandon Hoag at Glens Falls CC!

SARATOGA LAKE GC

Trevor Marsh of Saratoga Lake Golf Club will be ready to rock with his new Toro MultiPro 1750! Thank you.

TOWN OF CLIFTON PARK

The Town of Clifton Park get their new Toro Ultra Buggy 2500-TS. Thanks Dan, Kieran and crew!

JUNE FARMS

The crew at June Farms was excited to join the Ventrac family. A 4520N, Landscape Rake, Finish Deck and Power Rake is a nice way to start. Thanks Matt and Dan!

NYSOGS HARRIMAN CAMPUS

The NYSOGS Harriman Campus can maintain those tricky slopes with ease now with their new Ventrac 4520!

HUGE **REVOLUTION™** REBATE

Toro's new Revolution Series products are true commercial-grade equipment designed for professional use. With all-day runtime from the Toro developed HyperCell battery system, you can expect to power through your day, every day.

Built on the proven Grandstand and Z Master chassis & TURBO FORCE deck you've trusted for years, now electrified through Toro's HyperCell battery system. Welcome to the **REVOLUTION**.

Now through October 31, 2025 Purchase Any:

GRANDSTAND REVOLUTION

Customer receives:

**\$5,000 OFF PROMOTION OR
\$3,000 OFF PROMOTION + REVOLUTION HANDHELD BUNDLE***

OR

Z MASTER REVOLUTION

Customer receives:

REVOLUTION HANDHELD BUNDLE*

Customers who purchase through the NYS Contract, FLEET, or BID will receive the following:

GRANDSTAND REVOLUTION

Customer receives:

**\$3,000 ADDITIONAL OFF OR
\$1,800 ADDITIONAL OFF + REVOLUTION HANDHELD BUNDLE***

OR

Z MASTER REVOLUTION

Customer receives:

REVOLUTION HANDHELD BUNDLE*

*Includes: Revolution backpack blower, string trimmer, 6-pod charger, powerlink tether, & four 10Ah batteries (\$3,400 value)

NEW PROVEN PLATFORMS GET THE ELECTRIC TREATMENT

TurfMaster Revolution

AVAILABLE NOW

Cut more grass in fewer passes than ever before with the TurfMaster's wide 30" deck. The same proven 30" TurfMaster platform you know meets the quiet, commercial-grade battery power of Toro's Revolution Series. Every component from top to bottom is made for heavy use in rough conditions and designed to give you the professional-quality cut your customers demand.

TurfMaster Revolution features and benefits

- 60V* Flex-Force Power System
- Includes three 10Ah batteries
- Runtime up to 80 minutes
- Charge time up to 112 minutes
- 5-Amp Rapid Charger
- 30" 13-gauge steel cutting deck w/ bullnose bumper
- Variable Speed RWD
- 1.5"-5" (0.5" increments) HOC
- 1.1 maximum acres per hour

eProStripe® 560

COMING SOON

Toro is excited to introduce the eProStripe® 560. Equipped with two 60V Lithium-Ion batteries, this electric striper brings Toro's popular ProStripe line into the age of electrification.

Thanks to Toro's Flex-Force Power System™ battery technology, the lightweight, superb collection and striping performance capabilities are further enhanced by low sound and vibration levels, as well as zero engine emissions from the 60V Lithium-Ion powered eProStripe. For added convenience, the same batteries can be used to power Toro's entire line of Flex-Force hand tools and equipment, maximizing versatility and productivity for your grounds crew.

eProStripe 560 features and benefits

- 60V* Flex-Force Power System
- Includes two 10Ah batteries
- Superb striping performance
- 22" width
- Three preset speeds
- MatchDrive™ variable speed electric transmission
- Two-piece rear roller design
- MatchCut™ hcc adjustment system. (0.13" increments)

eHoverPro

AVAILABLE NOW

The new eHoverPro provides a zero-engine emission solution for golf course superintendents maintaining slopes and contoured surfaces. The mower is fully compatible with the Toro 60V* Flex-Force Power System™, allowing users to swap the 7.5Ah batteries across the extensive lineup of tools. The eHoverPro is built on a foundation of strength and is ultra-lightweight, which gives users better control and stability. Mowing hillsides, around bunkers and tee boxes is made easier with the help of a slope mower.

eHoverPro features and benefits

- 60V* Flex-Force Power System
- 7.5Ah battery
- Up to 25 minutes of runtime
- 5-Amp Rapid Charger
- Low noise and hand-arm vibration
- 18" cutting width
- Mow slopes up to 45 degrees

CITY OF SARATOGA REC DEPT

The City of Saratoga Recreation department took delivery of a SandPro 5040 to keep their fleet up to date.

CAPITAL HILLS GOLF COURSE

Capital Hills Golf Course got a new Greensmaster 3300 Triflex to add to their fleet. Thanks Matt.

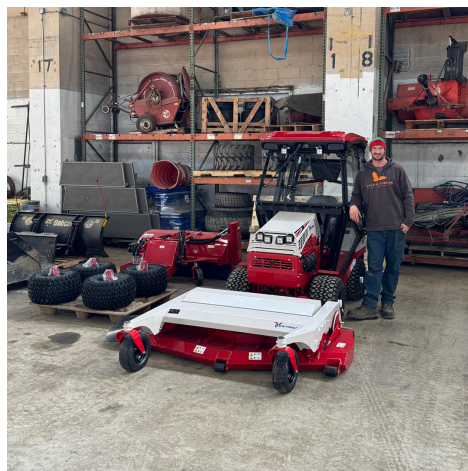

CAPITAL HILLS GOLF COURSE

Neil was happy to see their new Groundsmaster 4500 show up at Capital Hills Golf Course. Thanks Matt!

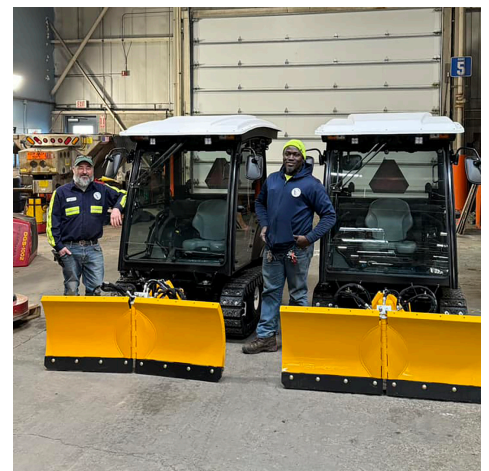

WOLFERT'S ROOST

David Morrow at Wolfert's Roost got his new Toro MultiPro P1750. Thank you for the continued support!

NISKAYUNA SCHOOLS

Kyle Lindley at Nisky Schools got his first Ventrac 4520Z, Cab, Finish Deck and Broom. Enjoy it and thank you!

CITY OF ALBANY

The City of Albany with 2 of their 3 new Toro Groundsmaster 7210's with Polar Trac's and V-plows. Thanks Mark!

SCHENECTADY MUNICIPAL HOUSING

Schenectady Municipal Housing continues to update their fleet of Ventrac with a new 4520N today. Thank you!

EAST GREENBUSH SCHOOL

Frank and the crew at East Greenbush School District took delivery of a new Toro FieldPro 6040.

CITY OF ALBANY

The City of Albany continues their fleet electrification plans with the arrival of two new Toro Revolution Z Masters!

THANK YOU CUSTOMERS!

BETHLEHEM SCHOOLS

The crew at Bethlehem Schools were very happy to see their new Toro Groundsmaster 4100 show up!

CITY OF SARATOGA SPRINGS

Lou at Congress Park took delivery of a Z Master Revolution along with a bunch of 60V Max Revolution Handheld Tools.

MALONE GOLF COURSE

Eric and Dustin from Malone Golf Course with their new Toro Greensmaster 3360. Thank you!

UNION ENDICOTT SCHOOLS

Union Endicott Schools takes delivery of their new Toro UTX diesel.

HILAND PARK COUNTRY CLUB

Hiland Park CC upgraded to a new Ventrac 4520N w/ a contour mower for trim mowing. Thanks Rafael and Dan!

GREATER AMSTERDAM CSD

Greater Amsterdam CSD got their second Ventrac! A 4520N with cab, a finish deck and snow blower.

SCHENECTADY SCHOOLS

Three all new Toro 72" Grandstand HDXs for Schenectady Schools today.

10

NYS DOT SARATOGA COUNTY

NYS DOT Saratoga County got 3 new Toro Z Master 6000 Series zero turns with Tweels for roadside mowing.

MOHAWK RIVER GOLF COURSE

Mohawk River GC with a nice Ventrac winter snow removal combo and a new Toro Pro Force debris blower to boot!

TORO Sets a New Standard, Unveils Next Generation Dingo® TX 1000 TURBO

TX 1000 TURBO

Toro set the standard when it first introduced the Dingo® TX 1000, the very first compact utility loader with a rated operating capacity of 1000 lbs, in 2015. Now, Toro is excited to redefine that standard with the introduction of its new Dingo TX 1000 TURBO.

The Dingo TX 1000 TURBO builds off the proven success and strongest in-class performance of the original Dingo TX 1000 with a turbo-powered diesel engine and the new patent-pending Smart Power® feature to maximize engine, auxiliary, and traction torque.

“When we first introduced the Dingo TX 1000, we made history in the compact utility loader market,” says Kyle Cartwright, product marketing manager at Toro. “Since that monumental introduction, we’ve worked closely with our customers to understand their needs and are excited to introduce the next iteration of the Dingo TX 1000, redesigned from the ground up to maximize strength and productivity.”

Operators will feel the difference, literally. The Dingo TX 1000 TURBO’s new engine has more torque to deliver the proven productivity of the Dingo TX 1000 quicker, especially when using the trencher and auger attachments. Toro engineers added a larger hydraulic filter, found in the Dingo TX 1300 model, for longer maintenance intervals and less down time. Available in both narrow- and wide-track models, the TURBO is built to suit operator and jobsite needs. The narrow-track model is 2,826 lbs (1,282 kg) and features a standard track with “B” style tread. The wide-track version is 2,911 lbs (1,320 kg) and features a less aggressive tread pattern that’s gentle on turf and minimizes damage.

“The reality is the Dingo TX 1000 changed the compact utility loader game. That’s why, when we approached the design, we wanted to ensure all the beloved and trusted features remained,” says Cartwright. “The new Dingo TX 1000 TURBO simply builds on the standard set by the original, and we’re so excited to get this new turbo-charged machine in the hands of operators.”

Like its predecessor, the Dingo TX 1000 TURBO has a rated operating capacity of 1,000 pounds. When the loader arms are at full reach the hinge pin measures an impressive 81 inches from the ground to allow the machine to easily reach over the side of dumpsters and one-ton trucks to maximize jobsite productivity.

Just like the original Dingo TX 1000, the new Dingo TX 1000 TURBO features a vertical lift loader arm design, which keeps the load closer to the machine to allow operators to lift more weight with greater confidence. Additionally, this feature increases the reach at full height to make dumping more efficient and accurate.

Operators will feel confident knowing the new Dingo TX 1000 TURBO has the Toro-exclusive patented traction control design. Deemed the smoothest controls in the market, these controls are intuitive and effortless, providing operators with all-day productivity. Other operator-centric features have been carried over, including thigh and hip padding on the operator station for a comfortable experience and an auxiliary foot control on the suspended platform which frees the operator’s hands to focus on ground speed and attachment positioning.

The 24.7 hp YANMAR® diesel engine is engineered with a focus on vibration reduction. The result is an engine more than capable of handling the most demanding applications. Delivering up to 4.1 mph ground speeds in both forward and reverse, the new Dingo TX 1000 TURBO maximizes productivity. The machine features a single diesel fuel tank (10.25 gallons) on the operator’s left-hand side and the hydraulic oil reservoir on the operator’s right-hand side for improved serviceability.

“With the introduction of TURBO, we’re also excited to share that we’ve invested in expanding production capacity across the full line, so we can continue to meet the needs of our customers,” says Cartwright.

Contact your Grassland commercial sales rep for more information.

GRANDSTAND SERIES **NEW MODELS**

Grandstand HDM

Models: 74532, 74535

- Updated, compact design reduces trailer space and storage and gives the ability to access more yards, more quickly
- Toro's design is 7 to 8" shorter than the leading competitors making it a true compact machine
- Features the proven 7-gauge TURBO FORCE® steel deck that is built to withstand extreme conditions
- Flip up utility hood provides easy access to perform routine maintenance and cleaning without the need for tools
- New 32" and 36" deck sizes available

Grandstand HDX

Models: 72506, 72510, 72514, 72517

- Bigger, stronger and more powerful with big block horsepower from either a 31 hp Kawasaki or 37 hp Vanguard engine
- 52", 60" and new 72" deck sizes available for ultimate productivity
- Cut time off any day with bigger 24" drive tires and max forward speeds of up to 12 mph
- Features the proven 7-gauge TURBO FORCE® steel deck that is built to withstand extreme conditions
- More efficient operation with a flip up operator platform, utility hood and easy to get on and off GRANDSTAND® HD+

Grandstand HD+

Models: 72507, 72512

- More power with big block horsepower from a 35 hp Kawasaki engine
- 52" and 60" deck sizes available
- Features the proven 7-gauge TURBO FORCE® steel deck that is built to withstand extreme conditions
- More efficient operation with a flip up operator platform, utility hood and easy to get on and off

Z MASTER NEW MODELS

4000 Series

All 4000 Series Z Master's now come standard with a 2" hitch receiver, solid linkage deck hangers, extended bull nose, and enhanced roller supports.

NEW Model: **74024** 72" HDX Pro XL

- 35 hp Kawasaki FX1000 engine
- **MyRIDE Suspension System**
- Voodoo Trac 26" x 12" -12" drive tires
- **72" 7-gauge TURBO FORCE deck**
- ZT-5400 Integrated Pumps
- Electric Deck Lift Assist Optional

NEW Model: **74057** 60" HDX

- 35 hp Kawasaki FX1000 engine
- **MyRIDE Suspension System**
- Voodoo Trac 26" x 12" -12" drive tires
- **60" 7-gauge TURBO FORCE deck**
- ZT-4400 Integrated Pumps
- Electric Deck Lift Assist Optional

5000 Series

NEW Model: **72907**

- 25 hp Kohler Command PRO EFI engine (747cc)
- 52" 7-gauge TURBO FORCE deck
- **Replaces Model 72906**

NEW Model: **72953**

- 25 hp Kohler Command PRO EFI engine (747cc)
- 60" 7-gauge TURBO FORCE deck
- MyRIDE Suspension System
- **Replaces Model 72951** (Limited Quantity still available)

NEW Model: **72923**

- 25 hp Kohler Command PRO EFI engine (747cc)
- 60" 7-gauge TURBO FORCE rear discharge deck
- Tweels
- **Replaces Model 72921**

NEW Model: **72956**

- 26.5 hp Kohler Command PRO EFI engine (747cc)
- 52" 7-gauge TURBO FORCE deck
- MyRIDE Suspension System
- **Replaces Model 72955** (Limited Quantity still available)

THANK YOU CUSTOMERS!

VOORHEESVILLE SCHOOLS

Voorheesville Schools can easily set up for sporting events and accomplish daily tasks with their new Toro Workman GTX.

CITY OF ALBANY RECREATION DEPT.

Jazz and Mike at the City of Albany completed training on their new Ventrac 4520N w/ MS600 and RV602 collection.

SARATOGA GOLF & POLO CLUB

Saratoga Golf & Polo Club is electrified by their new Lithium eFlex 21s! Whisper quiet for early morning mowing.

Toro Enhances IntelliDash® Irrigation and Fleet Management Platform

New features make the one-stop-shop for golf course management platform even more appealing for superintendents and course managers.

Golf course superintendents can monitor, manage, track and maintain the health of their operations all in one place with the updated IntelliDash platform from Toro. With just a glance, superintendents can view real-time operational data, including agronomic conditions, labor, asset location and equipment health. Additionally, course superintendents can use data to simplify course operations, improve efficiency and effectively allocate resources.

New Partnerships

For agronomic conditions, IntelliDash will continue to integrate popular Toro products like Lynx® Central Control, which aggregates essential irrigation information to better manage water and resources while maximizing course playability and aesthetics. New for 2024, Toro introduced the IntelliDash Alliance. This alliance was built from key industry partnerships to maximize the IntelliDash single platform experience and include:

- taskTracker (including turfRad)
- ezLocator
- playbooks for golf
- Golf Course Association of America (GCSAA)
- Soil Scout
- Pogo
- Perry Weather

IntelliDash®

New Product Features

Since its launch in July 2022, Toro has continuously developed and implemented new features to ensure the dashboard is a productive tool for superintendents and course managers. These updates include:

- **myTurf Pro Integration** - myTurf Pro customers have access to the IntelliDash platform with their Pro subscription.
- **Toro Irrigation National Support Network (NSN) Package Integration** - Active NSN subscribers will have access to the IntelliDash platform.
- **Geofencing (beta)** - Monitor digital boundaries and keep equipment within designated course areas, ensuring proper use of equipment while providing protection for off-limits or wet areas of the course that need special care.
- **Weather Averages** - Calculates weather averages by combining multiple weather services for informed predictions.

New Toro Lynx® Drive Revitalizes Golf Irrigation Software

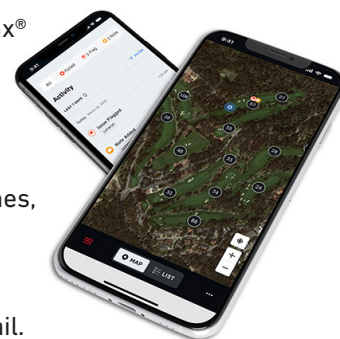

Proven Lynx Central Control platform is completely overhauled for greater usability and productivity

Toro is thrilled to debut a revolutionized way to think about irrigation control — the all-new Lynx® Drive. Lynx Drive is an energized, new approach to a proven platform designed with golf course superintendents in mind.

Lynx Drive is not just another update to the platform. It's an entirely new and improved way to manage golf course irrigation systems with ease. Using Lynx Drive ensures golf course superintendents, and their entire crew are informed about what is happening on the course at all times, resulting in more efficient operations and a better way to keep a finger on the pulse of the course. Designed specifically for smartphone or tablet use, the clean and simple interface puts all the Lynx essentials at your fingertips. The incredibly intuitive display includes larger buttons and text for enhanced visibility plus high-resolution images and colors for greater detail.

SmartNotes makes sticky notes, text messages and informal, disorganized chats a thing of the past, providing immediate communication with detailed notes, photos and team transparency. The ability to include a device name allows a view of who performed actions, while date and time stamps on photos deliver additional detail. SmartNotes maintains a note's history for up to one year. Precision is a key driver of the new features included in Lynx Drive. For example, issue flags pinpoint an issue report and associate it with a specific station, ensuring adjustments are always made in the correct spot. All alerts can be viewed by the entire crew for full transparency and timely action.

Additionally, the new expanded mapping features enable users to include files that can be shared through mobile and desktop programs. This allows for easy collaboration across a team and for effortless communication from day to day. Plus, changes can be made directly from the map on the app — no need to navigate to a different screen.

WOLFERTS ROOST COUNTRY CLUB

Wolferts Roost Country Club refreshed their old Toro GM 4500D with a shiny new one, thank you Dave!

SARATOGA LAKE GOLF COURSE

Mike at Saratoga Lake Golf Course with his new loaded Toro RM 5410, thank you Trevor and Cailean for your patience.

MOHAWK RIVER COUNTRY CLUB

Mohawk River Country Club took delivery of a new Toro MultiPro 5800 sprayer, thanks Rafael!

HILAND PARK COUNTRY CLUB

Hiland Park Country Club updated their rough game with a new Toro GM 4500D, thanks Dan and Rafael!

CITY OF ALBANY PARKS DEPT

The City of Albany Parks Department continues to upgrade their fleet with a new Toro GM 7210, thanks Mike!

BROOKHAVEN GOLF COURSE

All smiles at Brookhaven Golf Course with the arrival of their new Toro Workman UTX, thanks Geoff!

MARK TWAIN GOLF COURSE

Mark Twain GC adds to their growing Ventrac fleet with two 4520Ns with 95" decks.

NYOGS PARKING SERVICES

NYSOGS Parking Services was excited to get their new Ventrac 4520Y today. This will cut their steep slope string trimming jobs down to a minimum!

LAKE GEORGE SCHOOLS

Lake George Schools joined the Ventrac family with a 4520N equipped with a 3 point hitch and an MS720 finish mower.

VENTRAC 4520 UPDATES

4520 PRO Factory Upgrade Kit

We have seen promising growth in the KM500 loader. Because of the installation burden associated with the KM 3rd function kit, we decided to make it possible to equip a 4520 from the factory with the ability to run most attachments right out of the crate.

The PRO kit will include a selection of commonly requested access that will be factory-installed. This initiative aims to streamline the setup processes, saving Grassland valuable time without incurring any additional setup costs for you the customer. Tractors ordered with the 4520 PRO packages will have unique "PRO" graphics installed, noting the factory upgrade.

DETAILS:

Cost: MSRP sum of the five associated kits - **\$2,010**

Availability NOW

Applicable to any engine option

PRO kit includes:

- Foot Control (Kit # 70.4163, MSRP \$180)
- Front 12 Volt (Kit # 70.4161, MSRP \$385)
- Dual Front Hydraulic Auxiliary (Kit # 70.4164, MSRP \$620)
- Third Auxiliary Function (Kit # 70.8266, MSRP \$695)
- KM500 Relief valve (Kit # 70.8253, MSRP \$130)

SSV w/ 70.6020-99 Accessory Kit

In recent years, nearly 100% of the Ventrac SSV units we sold had the 70.6020-99 accessory kit included (weight transfer and PTO). Effective immediately, Ventrac has made the decision to make the accessory kit standard on every Ventrac SSV. As a result, the MSRP for the Ventrac 2120 SSV, with the included accessory kit, will be \$17,050.

4520 PRO Factory Upgrade Kit

Ventrac has pushed the limits of the renowned 4000 series slope mower and have developed the all-new Ventrac 45RC. Tackle steep terrain, whether you are in the seat operating or up to 500 feet away with the remote control.

The Ventrac 45RC offers dual operation modes to meet the operator's needs. Intuitive joystick controls and an industrial-grade remote ensure precision and durability in demanding environments. This advanced system prioritizes both durability and operator comfort, enhancing the overall remote mowing experience.

FEATURES:

- 32.5 hp Kubota WG972 EFI engine
- Operator-on and remote operation
- Live feed in RC mode camera
- 500 feet remote distance
- Ergonomic, easy-to-use joystick
- Digital display provides real-time operational data

SHAKER RIDGE CC

Lucas Butcher at Shaker Ridge Country Club were happy to see their new Toro Multi Pro 5800 sprayer show up!

NYS PARKS SARATOGA SPA

NYS Parks at Saratoga Spa upgraded their fleet with another new Toro Groundsmaster 4000. Thank you Brian!

DAVE APKARIAN

Dave Apkarian got his third Ventrac and first 4520N, thanks as always!

RENSSELAER POLYTECHNIC INSTITUTE

RPI is always keeping their 14 unit strong Ventrac fleet up to date! They also added a new Toro 60 gallon SprayMaster to make turf applications a breeze. Thanks Matt, Brad and JoAnne!

BACKYARD FENCE

Backyard Fence got an all new Dingo TX1000 Turbo. The new joystick design will make posthole digging a breeze!

SCHENECTADY MUNICIPAL HOUSING

Orchard Creek GC received their new Toro Greensmaster 3300 mowers, thanks Dan, Jim, Shaun and Austin.

CITY OF ALBANY

Four new Toro Groundsmaster 3300s for the City of Albany today. Huge thanks as always Mark.

BETHLEHEM PARKS

The crew at Bethlehem Parks just upgraded productivity big time with a new Groundsmaster 5900!

GRASSLAND & VENTRAC PARTNER W/ SUNY DELHI TURF PROGRAM

EDUCATING TOMORROW'S SUPERS

SUNY Delhi's renowned Golf and Sports Turf Management program prepares students to install and maintain beautiful, functional turf surfaces for golf courses, athletic fields, stadiums, and other venues.

In addition to classroom knowledge, the students also receive plenty of hands-on experience necessary to prepare them for the turfgrass industry. Grassland Equipment & Irrigation recognize the importance of this; and with the support of Ventrac wanted to get involved. A Ventrac is the perfect machine for students to learn on, with its versatile applications and extensive attachment lineup.

Prior to the 2024-2025 school year starting, Grassland Equipment delivered a new fuel-injected Ventrac 4520N along with a few significant attachments. Including a contour deck for undulations on the golf course, a turbine blower for leaf season and other debris cleanup, and a tough cut deck for those pesky native areas and brush.

[Right Top] Salesman, Chris Pogge, walks the SUNY Delhi turf program educators through the operation of their new teaching tools. [Right Middle/Bottom] We returned a few weeks later to talk to the students about the mechanics of machine and its operation.

We look forward to continuing to support them through the academic year and into the future.

For more content stay tuned to our socials or check out our YouTube channel @GrasslandEquipment

THANK YOU CUSTOMERS!

WOLFERTS ROOST

Wolferts Roost got his hands on a fresh new GM 4000 and 3500 Sidewinder.

18

BALLSTON SPA CSD

Out with the old and in with the new at Ballston Spa CSD, with a new Toro Groundsmaster 4100. Thanks Justin!

VOORHEESVILLE SCHOOLS

Voorheesville Schools added another Ventrac 4520N with a finish mower to their fleet today. Thanks Neil!

BROOKHAVEN GOLF COURSE

Mr. Geoffrey Leather's package is now complete, a Toro Greensmaster 3150, Reelmaster 3555-D, and a Groundsmaster 4300-D. He's looking forward to the 2025 growing season! Thank you Brookhaven Golf Course.

JOHN BOYD THACHER STATE PARK

John Boyd Thacher State Park got their new Groundsmaster 4000 today. Thanks Brian, Carley and Bill!

BETHLEHEM SCHOOLS

Bethlehem Schools increased productivity with a 96" Z Master. Thank you Jacob!

TOWN OF JOHNSBURG

The Town of Johnsburg got their new SSV with v-blade and drop spreader. No more hand shoveling sidewalks...

NYS PARKS IN SARATOGA

A 6-pack of Toro Workman Lithium GTXs for NYS Parks in Saratoga. Thank you Brian!

ALBANY COUNTRY CLUB

Albany Country Club can now do some major work with minor turf disruption in their new Toro Outcross 9060!

TOWN OF NISKAYUNA

A couple of new Z Master 6000 mowers for the Town of Niskayuna. Thanks Ken!

Visit Grasslandcorp.com to see our full selection of New and Pre-owned Equipment

Grassland has a great selection of Pre-Owned Toro equipment for turf professionals on a budget. These units can be offered with a factory supported warranty and financing is available. Selection varies and changes over time. If you are in the market for quality Pre-Owned equipment, contact your Grassland representative. Even if we do not have what you are looking for, we may be able to locate a unit to meet your needs. Why purchase from a third party broker when you can buy quality equipment from people who can offer you a Toro Factory Warranty and outstanding local service and parts support.
